

KENT

Optimal solutions for a perfect air conditioning system!

Premium products for air conditioner leak detection, sealing and cleaning – compatible for both refrigerants R134a & R1234yf

Professional air con system leak repair in two steps

Easy detection and sealing of existing circuit leaks

One of the most common causes of air conditioning system malfunction is **refrigerant loss due to a circuit leakage**. This leads imperceptibly to a reduction in capacity and to system performance loss or even total failure. The refrigerants **often diffuse from rubber lines and connections**.

Since a run time related loss of the refrigerant is normal, a leak detection at every service is a must. With our specially developed **A/C UV Leak Detection Kit and the A/C Leak Guard Kit** you can easily detect and seal existing leaks giving you the advantage **to boost your business and keep your clients satisfied**.

Part No. 85634 – Kit

A/C LEAK GUARD KIT

To prevent and stop refrigerant leakages on air conditioning systems

BENEFITS

- Will not harden, crystallize or clog the air conditioning system or refrigerant recovery equipment
- Easy to use and thus reduces downtime and operation costs – saves money on future A/C repairs
- No A/C recovery/charging machine needed
- Recommendation: 84234 - A/C Injection Hose for R134a

Kit includes (products also available separately)

- 85635 – A/C Leak Guard One Shot
- Additional – A/C Injection Hose for R134a (not available separately)

Part No. 85631 – Kit

A/C UV LEAK DETECTION KIT

A complete solution in one kit for air conditioning, coolant, oil and vehicle body leak detection

BENEFITS

- Fits to R134a and R1234yf refrigerant
- Will not harden, crystallize or clog the air conditioning system or refrigerant recovery equipment
- Easy to use and thus reduces downtime and operation costs
- Recommendation: 85632 - A/C UV Dye (6x 7,5 ml)

Kit includes (products also available separately)

- 84236 – 2x A/C UV Dye – only as 4x 30 ml available
- 86302 – A/C UV Lamp
- 84234 – A/C Injection Hose for Kits R134a
- 84232 – A/C UV Protection Goggles

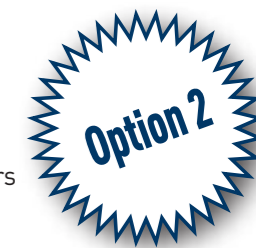

Part No. 86638 – aerosol

A/C STOP LEAK for R134a

Leak Stop for R134a without harmful polymers, will not harm or clog A/C system components or recovery machines

BENEFITS

- Multi-purpose use – suitable for belt and electric driven compressors
- Stops leaks – effective on rubber, metal, gaskets and O-Rings
- Easy to use – single use product

Part No. 86639 – aerosol

A/C STOP LEAK for R1234yf

Leak Stop for R1234yf without harmful polymers, will not harm or clog A/C system components or recovery machines

BENEFITS

- Multi-purpose use – suitable for belt and electric driven compressors
- Stops leaks – effective on rubber, metal, gaskets and O-Rings
- Easy to use – single use product

Additional products for A/C UV Leak Detection Kit and A/C Leak Guard Kit

Part No. 85633 – 240 ml

A/C UV UNIVERSAL DYE

UV dye for detecting leak areas in AC systems – when applied to an air conditioning system it will mix with the refrigerant and circulate throughout the system

BENEFITS

- ✔ Fits to R134a and R1234yf refrigerant
- ✔ Easy to use, inject cartridges directly into vehicle MAC system
- ✔ Fast and easy clean up
- ✔ Reduces downtime and operation costs
- ✔ Removes guesswork

Part No. 84238 – 6 x 30 ml

UV MULTIPURPOSE DYE

UV Multipurpose Dye is a unique formulation, designed to locate leaks in fuel systems, engines, gearboxes, differentials, power steering and hydraulic systems (not brake systems)

BENEFITS

- ✔ Easy to use
- ✔ Fast and easy clean up
- ✔ Reduces downtime and operation costs
- ✔ Removes guesswork

Part No. 86506 – Hose

A/C INJECTION HOSE for KITS R1234yf

Special hose for R1234yf refrigerants

BENEFITS

- ✔ Fits for A/C UV Leak Detection Kit
- ✔ Fits for A/C Leak Guard Kit
- ✔ Can be reused many times

Part No. 84240 – 500 ml

A/C UV DYE CLEANER

UV Dye Cleaner is designed to remove fluorescent dye residue from the leak area once the leak has been located and satisfactory repairs have been completed

BENEFITS

- ✔ Fast cleaning formulation
- ✔ Trigger spray application
- ✔ Saves time
- ✔ Easy to apply

Part No. 85643 – Gun

A/C Oil Gun

Specially developed A/C Oil Gun to apply PAG Oils

Includes

- 3x A/C Oil Guns
- 3x Oil Injection Hose for R134a
- 1x Wall mount

Also available separately

- 86644 – A/C Oil Injection Hose for R134a
- 86645 – A/C Oil Injection Hose for R1234yf

Part No. 86642 – 240 ml bottle

A/C UNIVERSAL OIL

Specially developed Universal PAG Oil. OEM approved to work with refrigerants R134a and R1234yf in belt driven compressors and electric driven compressors

BENEFITS

- ✔ Compatible with R134a and R1234yf – works with both used refrigerants
- ✔ Mixes with all viscosities (46 / 100 / 125 / 150) – one product instead of four
- ✔ Precisely measures the amount of oil – easy to use with a scale on the cartridge

Part No. 85639 – A/C PAG OIL 46 for R134a
Part No. 85638 – A/C PAG OIL 100 for R134a
Part No. 85641 – A/C PAG OIL 150 for R134a

A/C PAG OIL for R134a

Eliminates risk of oil contamination in the system

BENEFITS

- ✔ Fits to R134a
- ✔ Graduation scale on each cartridge Meets OEM specifications
- ✔ Different viscosities available
- ✔ longer shelf life; never exposed to atmosphere,

Impress your clients and increase your sales with our special air conditioning products focussing on interior applications

Part No. 86436 – 100 ml aerosol

AIR CO ONE SHOT

Anti-bacterial cleaner for a healthy climate in vehicle interiors

BENEFITS

- ✓ Bactericidal – comply with the standard EN 1276
- ✓ Anti yeast effect – comply with the standard EN 1650
- ✓ Disinfects, deodorises and refreshes the air conditioning systems – keeps the fresh air clean throughout the whole interior of the cabin

Part No. 86551 – 250 ml aerosol & extension straw

AIR CO CLEANER

Foam cleaner and disinfectant for AC systems of vehicles

BENEFITS

- ✓ Unique foaming action – good reaction located at the evaporator
- ✓ Excellent cleaning properties – disinfecting air-conditioning systems
- ✓ Biocide product – eliminates bacteria and yeasts

Part No. 86450 – unit

ULTRASONIC CONDITIONING UNIT 2

Professional in-car air quality system

BENEFITS

- ✓ Maintain vehicle air quality – safe, simple and cost effective solution
- ✓ Thorough & effective restoration thanks to the ultrasonic system
- ✓ Works on all vehicles – no residual smells

Part No. 86043 – 100 ml bottle

ULTRASONIC CONDITIONING SOLUTION

Cleaner solution for exclusive use with KENT Ultrasonic Conditioning Unit 2

BENEFITS

- ✓ One bottle per vehicle
- ✓ Easy to use
- ✓ Can be used with all competitor's ultrasonic AC conditioning units

Part No. 86229 – 150 ml, Mint

RE-ODOURISER MINT

A powerful high quality Re-Odouriser to refresh interiors of vehicles

BENEFITS

- ✓ Non irritant formula
- ✓ Safe to use – easy to apply
- ✓ Leaves vehicle smelling fresh
- ✓ Saves time

Part No. 85788 – 300 ml aerosol, Fruits of the Forest
Part No. 86089 – 300 ml aerosol, Eucalyptus

AIR CO REFRESH

A high performance product for use with all air conditioning units

BENEFITS

- ✓ Easy to apply – ensures fast effective use
- ✓ Allows directing of the product into hard to reach systems
- ✓ No residual smells

Part No. 85630 – Spicy Apple (red)
Part No. 85979 – Vanilla (white)
Part No. 86013 – Summer Breeze (pink)
Part No. 86643 – New Car (black)

VENT AIR FRESHENER

Used after each Ultrasonic cleaning operation

BENEFITS

- ✓ Used after each Ultrasonic Cleaning operation
- ✓ Clip-on vent – pack of 12 pieces
- ✓ Fragrance lasts for weeks
- ✓ Easy to use – saves time
